

Smaller Carry-Ons That Still Carry It All

Smart new bags and organizers can help take the sting out of tighter airline restrictions

Then there's the Scott eVest (\$140). A modern-day fisherman's or photographer's vest, this jacket's 22 pockets carry all manner of electronics, from PDAs to cell phones to cameras. The cavernous back pocket will even hold a small laptop. Best of all, because you wear it onto the plane, it doesn't count against your carry-on limit.
